Please note: The South African Government has lifted the requirement for international travellers to produce unabridged birth certificates, but the Botswana Government still require all parents travelling with children under the age of 18 years to produce a certified copy of their Unabridged Birth Certificates. Both South Africa and Botswana, require a consent form if only one adult is travelling with a child/children under the age of 18 years. Failure to produce the necessary documentation may result in travellers being turned away at port of entry. Please feel free to reach out to our reservations team for any further clarification on the same.
